Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-30, drawn to a packaged integrated circuit device, classified in

class 257, subclass 691.

II. Claims 31-41, drawn to a method of assembling an IC device, classified in

class 438, subclass 15.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The

inventions are distinct if either or both of the following can be shown: (1) that the

process as claimed can be used to make other and materially different product or (2)

that the product as claimed can be made by another and materially different process

(MPEP § 806.05(f)). In the instant case the process as claimed can be used to make

another materially different product whereby the product can be made without using a

process of sputtering and/or evaporating of an interconnect element.

3. Applicants are advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).
